and Answer Keys

Scientific notation is used to make extremely large or small numbers more manageable. Numbers written in scientific notation are the products of a digit term and an exponential term and are written in the general form $a \times 10^n$. For example, 0.0000234 is written 2.34×10^{-5} and 456,000 is written as 4.56×10^5 .
