Debian 7: System Administration Best Practices - O'Reilly ...

Debian is just one of many Linux distributions. Selecting which distribution is best for your deployment can be a rather daunting task. The reason for so many distributions is that the developers or sponsors of each have a different vision of which software should be installed by default, which software is appropriate for particular tasks, and how the system is best administered.

The Debian Packaging System (DPKG / DEB) was developed about the same time as the RPM, and has the same features, although they are implemented differently. DPKG refers to the original software packaging utility. This has been superseded by more flexible and user-friendly utilities, so this branch is often referred to by the extension used by the package files: DEB (.deb).
