As parents of a child with CVI, we know how daunting it can be to raise a child with visual impairment. Little Bear Sees is the first book about CVI written by parents for parents.

Book Description:

Cortical visual impairment, the leading cause of visual impairment in children today, is caused by

This is an excellent book for parents of children with Cortical Visual Impairment. It is well written and has many helpful resources. It is a wonderful addition to the very small library of books parents can use when their children have this type of visual impairment.

Dr. Roman-Lantzy,
author of Cortical
Visual Impairment: An
Approach to
Assessment and
Intervention, divides
CVI into three phases.
Most children start in

Phase I, which means that most of the CVI characteristics are present. As a child progresses through the three phases many of the characteristics begin to resolve. This process can take several years and requires diligence and persistence. Children in Phase III approach near normal vision to varying degrees and this may even result in literacy.
