The cause of joint cracking depends on a number of conditions. Situational information that is essential in detecting the cause of joint popping includes whether it is a singular episode of sounds coming from the joint or if it is a repeatable, recurrent event. Joint popping that occurs once only is sometimes a result of injury to the joint.

This synovial fluid in the joint cavity is formed by the synovial membrane, which is a thin membrane that combines with the fibrous membrane to form the joint capsule. This synovial fluid looks a bit like egg whites, which helps explain why the word ' ovum ,' or egg, helps to make up the word synovium.
