Maternal and Child Health. Related Pages. The Problem . The health of women and children is vital to creating a healthy world. Despite great progress, there are still too many mothers and children dying—mostly from causes that could have been prevented. Every day, approximately 800 women die from preventable causes related to pregnancy and childbirth. 99% of these deaths occur in developing ...

Significant progress has been made in improving maternal and child health globally, in part due to increased U.S. leadership and support. Since 1990, the annual number of child and maternal deaths has been more than halved. The United States has committed to saving the lives of 15 million children and nearly 600,000 women by 2020, as well as to strengthen health systems that enable countries ...
