EU Telecommunications Law

The Telecommunications Act of 1996 was the first significant overhaul of telecommunications law in more than sixty years, amending the Communications Act of 1934. The Act, signed by President Bill Clinton, represented a major change in American telecommunication law, since it was the first time that the Internet was included in broadcasting and spectrum allotment.

Telecommunications Act of 1996 - Wikipedia

Telecommunications technologies are defined by innovation and change. Telecommunications policy, however, is defined by certain enduring and recurring arguments and concepts. A priority of the course is to teach the key concepts and attendant arguments that are frequently articulated in the area of telecommunications law.
